Problem:

struggling to solve an exercise

Solution:

A notebook-like sandbox in which a student can experiment with coursework!

Intuitive to use.

Effortless.

General Purpose.

The pipeline:

1. Write your problem on the app screen
2. Problem is split into user statements
3. A screenshot of user statements is created
4. Screenshot is sent to a multimodal LLM via API
5. Model output is parsed and shown to screen
